This villa has plenty of storage the first being a large storage room to the rear of the pool area, to the rear of the villa is a second storage room which has a bathroom ideal when enjoying the pool in the summer months. The villa has a driveway with space for several cars and is accessed via electric sliding gate and to the rear is a large shed for even more storage. The current owners thought about every detail when refurbishing this villa and have used top quality materials throughout, there are a long list of extras as the air source heat pump system used to run the centralised hot/cold air conditioning system and to provide hot water, this system keeps the electric bills to a minimum (the owners currently pay approximately 120€ per month for electric) and the villa is separated into 3 zones making it easier to control different parts of the property a alarm system, mosquito nets, electric shutters, built in wardrobes and ceiling fans. This stunning villa is the perfect modern key ready property and must be seen to be truly appreciated!
